OUR MISSION

Incorporated in November 2006, Pitanco Precision Inc. was founded by Mister Alain Dutil, who has more than 30 years experience in the manufacturing of pressure and temperature instrumentation destined for the transportation and industrial sectors. In effect, Les Instrument Pitanco inc, the parent company of Pitanco Precision Inc. has existed for over 60 years and has distributed a wide range of products to world-wide destinations, all manufactured in Quebec (Canada). To meet the increasing demands of their clientele, the decision to create this new company was taken.

To ensure complete customer satisfaction and meet their expectations, the entire product line offered by Pitanco Precision was carefully selected, following a comprehensive and thorough analysis of the products. Quality and reliability are of the utmost importance to Pitanco Precision, therefore these and other selected criteria are the benchmarks that allow us to present a complete line of dependable and highly competitive products.

Also, to better suit the needs of our clientele, we have acquired and expended our facility to 14,000 sq. ft. located in the Delson industrial park, where both enterprises operate out of. Thus, Pitanco Precision now possesses an inventory with a large volume of pressure gauges, thermometers, diaphragm seals and instrumentation accessories to better serve the needs of the industry.

Our personnel are known and recognized for their professionalism, their expertise and their ability to adapt to any given situation. These qualities enable them to answer your requests promptly and without delay.

Thank you for the interest you have shown in Pitanco Precision Inc.

Pitanco your precision guarantee

TABLE OF CONTENTS

GAUGES

Nomenclature for pressure gauges	9
Multiple purpose pressure gauge - Model A	11 à 13
Contractor gauge - Model 450CB	14-15
Industrial gauge manufactured at our plant– Models 450PC6 and 451PC6	16
Differential industrial gauge manufactured at our plant– Models 450DP	17
Process gauge – Models 450PB and 450PSS	18-19
All purpose panel mount pressure gauge – Model PA	20
Welding gauge – Models WB and WSS	21
Low pressure gauge – Models LPB and LPSS	22 à 25
Low pressure gauge for panel mounting – Model LPB-UC	26
Portable low pressure test kit – Model TKLP	27
Glycerin filled industrial pressure gauge – Models LFB and LFB-BAY	28 à 35
Industrial gauge – Model SS	36-37
Industrial pressure gauge glycerin filled – Models LFSS and LFSSW	38 à 43
U-Clamp	44
Flange	45
High Accuracy Field Digital Pressure Gauge – Models DPG200, A, B, C & D, DPG280, B, C & D.....	46 à 54
Gauges filling and diaphragm seal assembly / Accessories and options for gauges	55
Other services and options / Gauge execution criterion and allowed tolerances (psi).....	56
Ranges and graduations chart for pitanco precision gauges.....	57
Conversion table	58
Operation and Maintenance of a Pressure Gauges	59

ACCESSORIES

Forged brass needle valve – Model NV25FFB	63
One piece brass or 316 stainless steel needle valve – Models NVB and NVSS316	64
Mini ball valve – Model MBV	65
Mini ball valve NPTF x NPTM, 1000 WOG – Model MBVSS25	65
Pigtail siphons	66
Cooling tower – Model CTSS	67
PTT (Test Plug or Pete's Plug®)	68
Snubber – Model SN	69
Ajustable Snubber – Model SNAJ	70

DIAPHRAGM SEALS

Mini diaphragm seal – Models MD175, MD250, MD251 and MD250LP	74
Diaphragm seal – Model D400	75-76
Polyvinyl chloride (PVC) diaphragm seal – Models 250PVC and 300PVC-LP	77
Sanitary diaphragm seal – Models DTC150SS and DTC200SS	78
Sanitary gauge – Models SDTC150 and SDTC200	79-80

TABLE OF CONTENTS (CONTINUED)

THERMOMETERS

Industrial 5 in thermometer – Models IT500A and IT500S	83
Industrial 8 in hot water thermometer – Models IT800A and IT800S	84
Multi-angle industrial thermometer 9 in – Model ITA900	85
Multi-angle solar digital industrial thermometer – Model ITA900SD	86
– Well for multi-angle industrial thermometer ITA900 and ITA900SD – Model WEL	87-88
Bimetal thermometer – Models B3 and B5	89-90
Bimetal thermometer for maple syrup – Model MS.....	91-92
Adjustable angle bimetal thermometer – Models B3A and B5A	93-94
Adjustable angle digital bimetal thermometer – Model digital B3DST	95
– Well for bimetal thermometer, fixed or adjustable stem – Model WEL	96
Hot water bimetal thermometer – Model B252	97
Clamp-on thermometer – Model TCL250	98
Remote reading HVAC thermometer – Models T200 and T250	99
Remote reading solar digital thermometer – Models DIT200 and DIT250	100
Remote reading thermometer manufactured at our plant – Models TC6 and TC7	101-102
Remote reading thermometer manufactured at our plant – Models PX5 and PX8	103-104
Stainless steel remote thermometer – Models TC400SS, TC401SS and TC402SS	105
– Wells remote thermometer – Model WEL-TC400	106
Thermometer front flange - Model TC35SS-03	107
Tridicator – Model TRI	108-109

NOMENCLATURE FOR PRESSURE GAUGES

EXAMPLE

First two digits	Size
15	1,5 in (40mm)
20	2 in (50 mm)
25	2,5 in (63 mm)
40	4 in (100 mm)
45	4,5 in (114 mm)
60	6 in (150 mm)
Third digit	Connection
0	Bottom connection
1	Back mount (center or lower back depending on series/model)

Serie	Type	Case/Tube
A	Multiple Purpose	Black steel/Brass
CB	Contractor	Stainless Steel/Brass
LFB	Liquid filled/Fillable	Stainless Steel/Brass
LFSS/LFSSW	Liquid filled/Fillable	Stainless Steel/Stainless Steel
WB	Welding/Gas	Polished brass/Brass
WSS	Welding/Gas	Polished brass/Stainless Steel
PA (before size)	Panel mount	Black steel/Brass
PB	Process	Phenolic/Brass
PSS	Process	Phenolic/Stainless Steel
LPB	Low Pressure	Black steel/Brass
LPSS	Low Pressure	Black steel/Stainless Steel

Last digits	Scale
01	-30 in/Hg
02	-30 in/Hg x 15 psi/kPa
03	-30 in/Hg x 30 psi/kPa
04	-30 in/Hg x 60 psi/kPa
05	-30 in/Hg x 100 psi/kPa
06	-30 in/Hg x 160 psi/kPa
07	-30 in/Hg x 200 psi/kPa
08	-30 in/Hg x 300 psi/kPa
09	0/15 psi/kPa
10	0/30 psi/kPa
11	0/60 psi/kPa
12	0/100 psi/kPa
13	0/160 psi/kPa
14	0/200 psi/kPa
15	0/300 psi/kPa
16	0/600 psi/kPa
17	0/1000 psi/kPa
18	0/1500 psi/kPa
19	0/3000 psi/kPa
20	0/5000 psi/kPa
21	0/10000 psi/kPa
22	0/2000 psi/kPa

24	0/40 psi/275 kPa
25	0/6000 psi/kPa
26	0/15000 psi/kPa
27	-

Last digits (continued)	Scale
28	0/4000 psi-kPa
29	-
30	30/150 psi x -40/85°F (Amonia)
31	30/300 psi x -55/125°F (Amonia)
5psi	0/5 psi/35 kPa
10psi	0/10 psi/70 kPa
15W0	0/15" H2O/oz
15WV	0/15" H2O Vacuum
32W0	0/32" H2O/oz
32WV	0/15" H2O Vacuum
55W0	0/55" H2O/oz
55WV	0/55" H2O Vacuum
100W0	0/100" H2O/oz
100WV	0/100" H2O Vacuum
200W0	0/200" H2O/oz
300WV	0/300" H2O Vacuum

Specials	Characteristics
-B	BAR/PSI scale
BAY	Bayonet Ring
-D	Dry
-K	Scale KG/cm2
-O2	Cleaned for Oxygen service
-X	LEAD FREE
-S	Silicone filled
-P	Propylene Glycol filled

MULTIPLE PURPOSE PRESSURE GAUGE MODEL A

Illustrated model:
400A16

Illustrated model:
401A10

Specifications

Case:	Steel, painted black
Dial:	White aluminum with psi graduations in black, kPa in blue (Std), kPa in green (-X)
Ring:	Steel, painted black
Lens:	Polycarbonate
Pointer:	Steel, painted black
Connection:	1/8 or 1/4 in nptm bottom or center back mount
Wetted parts:	Brass (Std), Lead Free Brass (-X)
Bourdon tube:	Phosphor bronze
Maximum process and ambient temperature:	-40 to 200°F / -40 to 93°C
Recommended pressure:	Maximum 75 % of full scale value
Overpressure limit:	25 % over full scale value
Accuracy:	ASME B40.100(B40.1), Grade B $\pm 2\%$
Certification:	Canadian Registration Number (CRN) for all provinces.

Dimensions as per diagram

Ø	Connection	A	B	C	D	E	F	G

CONTRACTOR GAUGE MODEL 450CB

Illustrated model: 450CB

Specifications

Case:	4 ½ in (115 mm), 304 stainless steel
Dial:	White aluminum, psi graduations in black, kPa graduations in blue
Ring:	304 stainless steel
Lens:	Polycarbonate
Pointer:	Anodized black aluminum, recalibrator screw
Connection:	¼ in nptm bottom mount
Wetted parts:	Brass (Std), Lead Free Brass (-X)
Bourdon tube:	Phosphor bronze
Maximum process and ambient temperature:	-40 to 200°F / -40 to 93°C
Recommended pressure:	Maximum 75 % of full scale value
Overpressure limit:	25 % over full scale value
Accuracy:	ASME B40.100(B40.1), Grade 1A ± 1 %
Certification:	Canadian Registration Number (CRN) for all provinces.

MODELS 450PC6 AND 451PC6

Illustrated model: 450PC6

Illustrated model: 451PC6

Diagram: 450PC6 and 451PC6

Specifications

Case:	Black molded aluminum, back flange standard, also available without flange with extra
Dial:	4 1/2 in (115 mm), white aluminum background, graduations psi and kPa in black
Ring:	Steel chrome Flated
Lens:	Glass or polycarbonate
Pointer:	Black painted aluminum, adjustable micrometer
Connection:	1/4 or 1/2 in nptm bottom or lower back mount
Wetted parts:	Brass
Bourdon tube:	Phosphor bronze
Maximum process and ambient temperature:	-40 to 200°F / -40 to 93°C
Recommended pressure:	Maximum 75 % of full scale value
Overpressure limit:	25 % over full scale value
Accuracy:	ASME B40.100(B40.1), Grade A $\pm 1\%$ also available Grade 2A $\pm 0.5\%$

PROCESS GAUGE MODELS 450PB AND 450PSS

Illustrated model: 450PB15

Specifications

Case:	4 1/2 in (115 mm), Phenolic black
Dial:	White aluminum with psi graduations in black, kPa in blue
Ring:	Phenolic black
Lens:	Acrylic (Std), Safety glass (-6S)
Pointer:	Black anodized aluminum, micrometer adjustable
Movement:	Overload stop movement (Std), Cushioned movement (-6S)
Seal:	NBR (Std), Viton (-6S)
Connection:	1/4 or 1/2 in nptm bottom or lower back mount
Wetted parts:	Brass for PB / 316 stainless steel for PSS
Bourdon tube:	Phosphor bronze for PB / 316 stainless steel for PSS
Ambient temperature:	-40 to 200°F / -40 to 93°C (For dry gauge)
Maximum process temperature:	-40 to 200°F / -40 to 93°C (dry) -4 to 200°F / -20 to 93°C (Glycerin) -40 to 200°F / -40 to 93°C (Silicone) + 200°F / +93°C (Consult Pitanco Precision)
Recommended pressure:	Maximum 75 % of full scale value
Overpressure limit:	25 % over full scale value
Accuracy:	ASME B40.100(B40.1), Grade 2A ± 0,5 %
Certification:	Canadian Registration Number (CRN) for all provinces.

ALL PURPOSE PANEL MOUNT PRESSURE GAUGE

MODEL PA

Illustrated model: PA

Specifications

Case:	Steel Flated black complete with U-clamp
Dial:	White aluminum with psi graduations in black and kPa in blue
Ring:	304 stainless steel crimped
Lens:	Plastic
Pointer:	Steel painted black
Connection:	1/8 in or 1/4 in nptm center back (see chart)
Wetted Parts:	Brass
Bourdon tube:	Phosphor bronze
Maximum process and ambient temperature:	-40 to 200°F / -40 to 93°C
Recommended pressure:	Maximum 75 % of full scale value
Overpressure limit:	25 % over full scale value
Accuracy:	ASME B40.100(B40.1), Grade B $\pm 2\%$
Certification:	Canadian Registration Number (CRN) for all provinces.

LOW PRESSURE GAUGE MODELS LPB AND LPSS

Illustrated model: 250LPB15W0

Illustrated model: 251LPB

Specifications

Case:	Steel, painted black for LPB / 304 stainless steel for LPSS
Dial:	White aluminum, with H2O or psi graduations in black, oz or kPa in blue
Ring and lens:	Snap-in polycarbonate for 2 1/2 in (63 mm), 304 stainless steel bayonet and polycarbonate lens for 4 in (100 mm)
Pointer:	Aluminum, painted black
Connection:	1/4 in nptm bottom or center back. brass for LPB / 316 stainless steel for LPSS
Wetted parts:	Brass for LPB / 316 Stainless Steel for LPSS
Capsule diaphragm:	Phosphor bronze for LPB / Stainless Steel for LPSS
Ambient temperature:	-40 to 200°F / -40 to 93°C
Recommended pressure:	Maximum 75 % of full scale value
Surpression limite:	25% over full scale value.
Accuracy:	ASME B40.100(B40.1), Grade B $\pm 2\%$
Certification:	Canadian Registration Number (CRN) for all provinces.

LOW PRESSURE GAUGE FOR PANEL MOUNTING MODEL LPB-UC

Illustrated model: LPB-UC

Specifications

Case:	Black Flated steel with U-clamp
Dial:	White aluminum with psi graduations in black, kPa in blue
Lid and lens:	Screwed polycarbonate
Pointer:	Steel painted black
Connection:	1/4 in nptm center back
Wetted parts:	Brass
Bourdon tube:	Phosphor bronze
Maximum process and ambient temperature:	-40 to 200°F / -40 to 93°C
Recommended pressure:	Maximum 75 % of full scale value
Overpressure limit:	25 % over full scale value
Accuracy:	ASME B40.100(B40.1), Grade B $\pm 2\%$
Certification:	Canadian Registration Number (CRN) for all provinces.

To order, use the code in the corresponding column

Size	1 1/2 in (40 mm)	2 in (50 mm)	2 1/2 in (63 mm)

PORTABLE LOW PRESSURE TEST KIT

MODEL TKLP

Illustrated model: TKLP

Specifications

Case:	Steel, painted black
Dial:	2 1/2 in (63 mm) white aluminum with oz/in ² or kPa graduations in black, H ₂ O in blue
Lens:	Snap-in polycarbonate
Pointer:	Aluminium, painted black
Zero clearing:	Screw located on back of gauge
Connection:	1/4 in brass hose barb, Brass
Wetted parts:	Brass
Capsule diaphragm:	Phosphor bronze
Maximum process and ambient temperature:	-40 to 200°F / -40 to 93°C
Accuracy:	ASME B40.100(B40.1), Grade B $\pm$ 2 %

Case specifications

Material:	Blue or black injection molded plastic with integral handle
Hose tube:	Latex rubber 3 ft (91 cm) length, 0.197 in (5 mm) inside diameter x 0.315 in (8 mm) outside diameter
Hose end-connection:	Latex rubber 0.390 in inside diameter (9.92 mm) x 0.660 in outside diameter (16.77 mm) x 0.545 in long (13.86 mm)
Hose adapter:	Brass, 1/8 in nptm x 1/4 in hose barb

To order, use the code in the corresponding column

Range / Pressure	Product code
0 to 15 in H ₂ O / 0 to 4 kPa	TKLP250-15
0 to 35 in H ₂ O / 0 to 20 oz/po ²	TKLP250-35
0 to 100 in H ₂ O / 0 to 58 oz/po ²	TKLP250-100

GLYCERIN FILLED INDUSTRIAL PRESSURE GAUGE MODEL LFB

Illustrated model: 250LFB10

Illustrated model: 251LFB19

Diagram: LFB Bottom 1,5, 2,5 and 4 in

Diagram: LFB Center back 1,5 and 2,5 in

Specifications

Case:	304 stainless steel
Dial:	White aluminum with psi graduations in black and kPa graduations in blue
Ring:	304 stainless steel, hermetically sealed or bayonet style (model BAY)
Lens:	Polycarbonate
Pointer:	Anodized black aluminum
Connection:	1 ½ in (40 mm) 1/8 in nptm bottom or center back, 2 ½ in (63 mm) 1/4 in nptm bottom or center back, 4 in (100 mm) 1/4 in nptm bottom or lower back
Wetted parts:	Brass (Std), Lead Free Brass (-X)
Bourdon tube:	Phosphor bronze (Std), Lead Free Brass (-X)
Ambient temperature:	-40 to 200°F / -40 to 93°C (For dry gauge)
Maximum process temperature:	-40 to 200°F / -40 to 93°C (dry) -4 to 200°F / -20 to 93°C (Glycerin) -40 to 200°F / -40 to 93°C (Silicone) + 200°F / +93°C (Consult Pitanco Precision)
Recommended pressure:	Maximum 75 % of full scale value
Overpressure limit:	25 % over full scale value
Accuracy:	ASME B40.100(B40.1), Grade B ±2%
Certification:	Canadian Registration Number (CRN) for all provinces.

INDUSTRIAL GAUGE MODEL SS

Illustrated model:
400SS01

Illustrated model:
251SS01

Specifications

Case:	304 stainless steel
Dial:	White aluminum with psi graduations in black, kPa in blue
Ring:	304 stainless steel, hermetically sealed
Lens:	Polycarbonate
Pointer:	Black anodized aluminum
Connection:	316 Stainless Steel
Wetted parts:	316 Stainless Steel
Bourdon tube:	316 Stainless Steel
Maximum process and ambient temperature:	-40 to 200°F / -40 to 93°C
Recommended pressure:	Maximum 75 % of full scale value
Overpressure limit:	25 % over full scale value
Accuracy:	ASME B40.100(B40.1), Grade B $\pm 2\%$

Dimensions as per diagram

Ø	Connection	A	B	C	D	F	G

INDUSTRIAL PRESSURE GAUGE GLYCERIN FILLED MODELS LFSS AND LFSSW

Illustrated model: 250LFSS21W

Illustrated model: 251LFSS12W

Specifications

Case:	304 stainless steel
Dial:	White aluminum with psi graduations in black, kPa in blue
Ring:	304 stainless steel, bayonet style except 1 ½ in (40 mm) hermetically sealed
Lens:	Polycarbonate
Pointer:	LFSS: Black anodized aluminum for 1 ½ in (40 mm), 2 in (50 mm), 2 ½ in (63 mm) and 4 in (100 mm) LFSSW: adjustable pointer for 4 in (100 mm) and 6 in (150 mm)
Connection:	316 Stainless Steel
Wetted parts:	316 Stainless Steel
Bourdon tube:	316 Stainless Steel
Ambient temperature:	-40 to 200°F / -40 to 93°C (For dry gauge)
Maximum process temperature:	-40 to 200°F / -40 to 93°C (dry) -4 to 200°F / -20 to 93°C (Glycerin) -40 to 200°F / -40 to 93°C (Silicone) + 200°F / +93°C (Consult Pitanco Precision)
Recommended pressure:	Maximum 75 % of full scale value
Overpressure limit:	25 % over full scale value
Accuracy:	ASME B40.100(B40.1), Grade B $\pm 2\%$, 1 ½ in (40 mm), 2 in (50 mm), 2 ½ in (63 mm) and 4 in (100 mm) LFSS Grade A $\pm 1\%$ for 4 in (100 mm) and 6 in (150 mm) LFSSW
Certification:	Canadian Registration Number (CRN) for all provinces.

Notes

- * Screws are not included
- Flange assembly and welding to the gauge is required. Code FLA

HIGH ACCURACY FIELD DIGITAL PRESSURE GAUGE MODEL DPG200

Specifications

Pressure range:	Vacuum to 1000 bar
Overpressure limit:	Range $\geq$ 10MPa 150%; Range < 10MPa 200%
Pressure units available:	Bar, psi, kPa, Kg/cm ² , MPa (Readings available depending on pressures).
Temperature compensation:	10 ~ 30°C
Accuracy:	$\pm 0.2\%$ FS
Materials:	304 stainless steel case and connection
Dial:	4" (100mm)
Display:	4 digits LCD display
Connection:	1/4" NPT
Supply:	3V (2 AAA batteries).
Battery life:	Low power design keeping it work more than 12 months
IP rating:	IP50
Peak values:	Minimum and maximum
Display updated rate:	5 times/second (or according to client's demand)
Electric Protection:	Reverse protection, anti-electromagnetic interference
Functions:	Zero clearing, On/off button, Low voltage alarm. Maximum and minimum function.

To order, use the code in the corresponding column

Range	Product code
-30 in Hg to 0 vac	DPG200-01
0 to 5 psi	DPG200-5psi
0 to 100 psi	DPG200-12
0 to 200 psi	DPG200-14
0 to 400 psi	DPG200-23
0 to 600 psi	DPG200-16
0 to 2,000 psi	DPG200-22
0 to 5,000 psi	DPG200-20
0 to 10,000 psi	DPG200-21

Notes

1) Other scales, types and models available upon request.

HIGH ACCURACY FIELD DIGITAL PRESSURE GAUGE MODEL DPG200A

Specifications

Pressure range:	Vacuum to 1600 bar
Pressure type:	Gauge pressure, negative relative pressure, absolute pressure
Pressure units available:	MPa, kPa, Pa, psi, bar, kgf/cm ² , mbar, inH ₂ O, mmHg, Torr, atm, mmH ₂ O, mH ₂ O (Readings available depending on pressures).
Overpressure limit:	Range: <10MPa 150%; ≥10MPa 120%
Accuracy:	0.4% F.S
Long term stability:	0.2% FS / year
Materials:	304 stainless steel case and connection
Dial:	4" (100mm)
Display:	High resolution 5 digits LCD display with backlight
Connection:	1/4" NPT
Supply:	4.5V (3 batteries AA) or USB powered
Battery life:	≥18 month (subject to operating conditions)
IP rating:	IP50
Display updated rate:	3 times/second (or according to client's demand)
Peak values:	Minimum and maximum
Electric Protection:	Anti-electromagnetic interference, according to EN61326
Fonctions:	Zero clearing, On/off button, Low voltage alarm. Maximun and minimum function.. White backlight, change of measurement unit , recording of maximum values, display of the pressure percentage

To order, use the code in the corresponding column

Range	Product code
-30 in Hg to 0 vac	DPG200A-01
-30 in Hg to 300 psi/kPa	DPG200A-08
0 to 5 psi	DPG200A-5psi
0 to 10 psi	DPG200A-10psi

Notes

1) Other scales, types and models available upon request .

HIGH ACCURACY FIELD DIGITAL PRESSURE GAUGE MODEL DPG200B

Specifications

Pressure range:	Vacuum to 1600 bar
Pressure type:	Manometric pressure, negative relative pressure, absolute pressure
Pressure units available:	MPa, kPa, Pa, psi, bar, kgf/cm ² , mbar, inH ₂ O, mmHg, Torr, atm, mmH ₂ O, mH ₂ O (Readings available depending on pressures).
Overpressure limit:	Range: <100bar 150%; ≥10bar 120%
Accuracy:	0.2% F.S
Long term stability:	0.2% FS / year
Materials:	304 stainless steel case and connection
Dial:	4" (100mm)
Display:	High resolution 5 digits LCD display
Connection:	1/4" NPT
Supply:	4.5V (3 batteries AA) or USB powered
Battery life:	≥18 month (subject to operating conditions)
IP rating:	IP50
Display updated rate:	3 times/second (or according to client's demand)
Peak values:	Minimum and maximum
Electric Protection:	Anti-electromagnetic interference, according to EN61326
Functions:	Zero clearing, On/off button, Low voltage alarm, Maximum and minimum function. White backlight, change of measurement unit, recording of maximum values, display of the pressure percentage.

To order, use the code in the corresponding column

Range	Product code
0 to 5 psi	DPG200B-5psi
-30 in Hg to 300 psi/kPa	DPG200B-08
0 to 5,000 psi	DPG200B-20

HIGH ACCURACY FIELD DIGITAL PRESSURE GAUGE MODEL DPG200D

Specifications

Pressure range:	Vacuum to 1600 bar
Pressure type:	Manometric pressure, negative relative pressure, absolute pressure
Pressure units available:	MPa, kPa, Pa, psi, bar, kgf/cm ² , mbar, inH ₂ O, mmHg, Torr, atm, mmH ₂ O, mH ₂ O (Readings available depending on pressures).
Overpressure limit:	Range: <100bar 150%; ≥10bar 120%
Accuracy:	0.2% F.S
Long term stability:	0.2% FS / year
Materials:	304 stainless steel case and 316SS connection
Dial:	4" (100mm)
Display:	High resolution 5 digits LCD display
Connection:	1/4" NPT
Supply:	4.5V (3 batteries AA) or USB powered
Battery life:	≥18 month (subject to operating conditions)
IP rating:	IP50
Display updated rate:	3 times/second (or according to client's demand)
Peak values:	Minimum and maximum
Electric Protection:	Anti-electromagnetic interference, according to EN61326
Fonctions:	Zero clearing, On/off button, Low voltage alarm, Maximun and minimum function. White backlight, change of measurement unit, recording of maximum values, display of the pressure percentage.

HIGH ACCURACY FIELD DIGITAL PRESSURE GAUGE MODEL DPG280

Specifications

Pressure range:	Vacuum to 1000 bar
Overpressure limit:	Range $\geq 10\text{Mpa}$ 150%; Range $< 10\text{MPa}$ 200%
Pressure units available:	bar, psi, kPa, Kg/cm ² , MPa (Readings available depending on pressures).
Temperature compensation:	10 ~ 30°C
Accuracy:	$\pm 0.4\%$ F.S
Materials:	304 stainless steel case and connection
Dial:	3" (80mm)
Display:	4 big digits LCD display with backlight
Connection:	1/4" NPT
Supply:	3V (2 AAA batteries)
Battery life:	Low power design keeping it work more than 12 months
IP rating:	IP50
Peak values:	Minimum and maximum
Display updated rate:	5 times/second (or according to client's demand)
Electric Protection:	Reverse protection, anti-electromagnetic interference
Fonctions:	Zero clearing, On/off button, Low voltage alarm, Maximun and minimum function.

To order, use the code in the corresponding column

GAUGES FILLING AND DIAPHRAGM SEAL ASSEMBLY

Description	Product code
Gauge filling 4 in (100 mm) - Glycerin (FDA) 0 to 200°F / -17 to 93°C	G-400
Gauge filling 4 1/2 in (115 mm) - Glycerin (FDA) 0 to 200°F / -17 to 93°C	G-450
Gauge filling 6 in (150 mm) - Glycerin (FDA) 0 to 200°F / -17 to 93°C	G-600
Glycerin (FDA) 4 liters (1 gallon) 0 to 200°F / -17 to 93°C	G4L
Gauge filling 1 1/2 and 2 in (50 mm) - Silicone 1000 CS -50 to 400°F / -45 to 200°C	S-200
Gauge filling 2 1/2 in (63 mm) - Silicone 1000 CS -50 to 400°F / -45 to 200°C	S-250
Gauge filling 4 in (100 mm) - Silicone 1000 CS -50 to 400°F / -45 to 200°C	S-400
Gauge filling 4 1/2 in (115 mm) - Silicone 1000 CS -50 to 400°F / -45 to 200°C	S-450
Gauge filling 6 in (150 mm) - Silicone 1000 CS -50 to 400°F / -45 to 200°C	S-600
Silicone 1000 CS 4 liters (1 gallon) -50 to 400°F / -45 to 200°C	S4L
Gauge filling 1 1/2 and 2 in (50 mm) - Propylene Glycol (FDA) -67 to 293°F / -55 to 145°C	PRGL-200
Gauge filling 2 1/2 in (63 mm) - Propylene Glycol (FDA) -67 to 229°F / -55 to 145°C	PRGL-250
Gauge filling 4 in (100 mm) - Propylene Glycol (FDA) -67 to 229°F / -55 to 145°C	PRGL-400
Gauge filling 4 1/2 in (115 mm) - Propylene Glycol (FDA) -67 to 229°F / -55 to 145°C	PRGL-450
Gauge filling 6 in (150 mm) - Propylene Glycol (FDA) -67 to 229°F / -55 to 145°C	PRGL-600
Propylene Glycol (FDA) 4 liters (1 gallon) -67 to 229°F / -55 to 145°C	PRGL-4L
Diaphragm seal filling - Glycerin (FDA) -40 to 160°F / -40 to 70°C (standard)	FIL-GWD
Diaphragm seal filling - Propylene Glycol (FDA) -67 to 229°F / -55 to 145°C	FIL-PRGL
Diaphragm seal filling - Silicone DC200 1000 CS, -50 to 400°F / -45 to 200°C	FIL-SID
Diaphragm seal filling - Silicone DOT 5, -70 to 600°F / -56 to 315°C	FIL-SIHD
Diaphragm seal filling - Syltherm XLT, -150 to 500°F / -100 to 260°C	FIL-SYL
Diaphragm seal filling - Fluorolube FS5, -50 to 500°F / -45 to 260°C	FIL-FS5D
Drying out gauges (all sizes)	ASSECHAGE

ACCESSORIES AND OPTIONS FOR GAUGES

Description	Product code
Rubber protector for Gauge 2 1/2 in (63 mm)	GP-250
Rubber protector for digital Gauge 3 in (77 mm)	GP-280
Rubber protector for digital Gauge 4 in (100 mm)	GP-200
Safety glass 2 1/2 in (63 mm)	SG-250
Safety glass 4 in (100 mm)	SG-400
Safety glass 4 1/2 in (115 mm)	SG-450
Standard glass 1 1/2 in (40 mm)	VG-150
Standard glass 2 in (50 mm)	VG-200
Standard glass 2 1/2 in (63 mm)	VG-250
Standard glass 4 in (100 mm)	VG-400
Standard glass 4 1/2 in (114.3 mm)	VG-450
Polycarbonate lens with red needle indicating the maximum pressure on a pressure gauge (400LFSSW only)	MAX-400
Polycarbonate lens with red needle indicating the maximum pressure on gauge (450P only)	MAX-450

OTHER SERVICES AND OPTIONS

Product code	Description
CERT-C	Calibration certificate for gauges having both negative (vacuum) and positive pressure (compound)
CERT-HT	Calibration certificate for new and used high temperature thermometer (+300°F)
CERT-M	Calibration certificate for new gauge, traceability to NRC and NIST
CERT-T	Calibration certificate for new and used thermometer
CERT-U	Calibration certificate for used gauge (all brand)
CERT-X	Calibration certificate for gauges "Master"
OS1	Oxygen clean for gauge of 1 ½ in (40 mm) to 3 ½ in (87 mm)
OS2	Oxygen clean for gauge of 4 in (100 mm) and 4 ½ in (115 mm)
OS3	Oxygen clean for gauge of 6 in (150 mm)
OSBV1	Oxygen clean for ball valve of ¼ in nptf to 1 in nptf (2 pieces)
OSBV2	Oxygen clean for ball valve of 1 ½ in nptf to 3 in nptf (2 pieces)
OSBVD	Oxygen clean for ball valve of more than 3 in (2 pieces)

CONVERSION TABLE

Method of using the conversion table:

- 1) Find the unit of measure to be converted from the left column.
- 2) Multiply the appropriate pressure by the factor shown under the corresponding unit of measure from the top row to obtain the desired conversion.

Example: How to obtain 150 psi in kPa?
 $150 \text{ (psi)} \times 6,894757 \text{ (kPa)} = 1,034,22 \text{ kPa}$

To	psi	kPa	bar	Kg/cm ²	mpa	mbar	in hg	cm hg	mm hg	in H ₂ O	cm H ₂ O	oz/in ²	ft H ₂ O	m H ₂ O	mm H ₂ O	atm

OPERATION AND MAINTENANCE OF A PRESSURE GAUGE

Inspection Frequency

The frequency of inspection is dependent on the severity of service and how critical the accuracy of the indicating pressure. The inspection frequency can range from monthly to annual basis. To ensure the accuracy of your pressure readings, it is strongly recommended that all pressure gauges be recalibrated and certified at least annually. Pitanco Instruments/Pitanco Precision can provide test certification that are traceable to the National Institute of Standards and Technology (NIST).

Isolating Valves

It is recommended that isolating valves be fitted with the gauge. This enables the gauge to be removed at any time for checking, recalibration or replacing without interruption to the process. The valves should be opened or closed slowly to avoid sudden changes to pressure being applied to the gauge. It is recommended for systems that have an abrupt pressure surge at start-up to close the valves during initial start-up. Pitanco Precision carries various types of valves. Materials Brass wetted parts are suitable for use on the following types of media: air, oil, water and other non-corrosive fluids. For corrosive fluids, consulting Pitanco Precision for special applications is recommended as diaphragm seals may also be considered.

Pulsations

If pressures are expected to pulsate violently, oscillate with high frequency or occur with sudden shocks, a snubber should be considered. Pitanco Precision snubbers incorporate a sintered porous 316 stainless steel snubbing element with a large surface area to ensure long term effectiveness on most pressure media. Snubbers are available in three viscosity classifications: Heavy Oil (O), Water (W) and/or Air (A).

Temperatures

Normal ambient temperature is -40°F to 150°F for dry gauges. Medium temperature for -40°F to 200°F for dry gauges, -4°F to 150°F for glycerin filled ones and -40°F to 200°F for Silicone ones. Processes with temperature exceeding 200°F can be accommodated with the use of some kind of external cooling such as pig tails or cooling towers. In situations where the process temperature is extreme, the use of diaphragm seals with or without capillaries may be necessary. In general, a gauge is unduly hot if it cannot be grasped by hand without discomfort. It should be noted that gauges used on water might burst if exposed to frost.

Vibrations

Vibration can affect the dial reading of pressure gauges so must be avoided as much as possible. Vibration effects can be minimized with the use of a dampening liquid such as glycerin or silicone. If vibration is extreme, a flexible capillary connected to a diaphragm seal may be considered.

Mounting

A suitable thread sealant is required for NPT threads such as pipe dope or PTFE tape. The gauge should only be installed by hand only until the first 2 threads engage. This will allow the gauge socket thread to be seated correctly. The use of 2 open-ended wrench should be used on the socket flats to tighten the gauge and ensure no damages to the gauge.

IMPORTANT

- 1) **DO NOT** tighten the gauge completely by hand, you will severely damage it!
- 2) **The use of a swivel coupling is required in order for the gauge reading to face you!**

Venting Procedures

Due to pressure build-up, some gauges (usually lower pressure ranges such as vacuum, up to 100 psi) may reflect a reading that is slightly "off zero". To properly "vent" the pressure gauge, cut off the tip of the fill plug after you have installed the instrument. This allows the gauge to be equal to the atmospheric pressure. Venting can also be achieved by lifting the vent plug for a moment, squeezing the window and back and re-seat (closing) it.

In either case, the gauge should be installed in an upright position to avoid the liquid from leaking.

Accessories

FORGED BRASS NEEDLE VALVE

MODEL NV25FFB

Illustrated model: NV25FFB

Specifications	
Housing:	Forged brass #59-1
Handle:	ABS red plastic
O-ring:	Rubber
Operating pressure:	0 to 400 psi / 0 to 2 758 kPa
Operating temperature:	-9 to 212°F / -23 to 100°C
Connection	Product code
¼ in nptf x ¼ in nptf	NV25FFB

ONE PIECE BRASS OR 316 STAINLESS STEEL NEEDLE VALVE MODELS NVB AND NVSS316

Illustrated model: NV25FFSS316

Illustrated model: NV50FFB

Specifications

Housing:	One piece brass	One piece 316 stainless steel
Packing:	Stainless Steel	Teflon
Stem:	Brass	316 Stainless Steel
Operating pressure:	0 to 2 000 psi / 13 790 kPa	0 to 6 000 psi / 41 369 kPa
Operating temperature:	< 300°F / 150°C	< 500°F / 250°C

Connection	Product code	Product code
¼ in nptf x ¼ in nptf		NV25FFSS316
½ in nptf x ½ in nptf	NV50FFB	NV50FFSS316
¾ in nptf x ¾ in nptf		NV75FFSS316
1 in nptf x 1 in nptf		NV100FFSS316

Notes

Conical stem which penetrates more or less in an orifice and serves to adjust the flow of a non-corrosive fluid.
It is always recommended to install a mini ball valve or a needle valve on a line before each pressure gauge installation.

Dimensions as per diagram

Model	A	B	Ø C	D	E	Connection F
NV25FF	3,85 in (97.9 mm)	0,98 in (24.9 mm)	0,56 in (14.2 mm)	2,38 in (60.5 mm)	1,98 in (50.3 mm)	¼ in nptf

NV100FF	4,83 in (122.7 mm)	1,75 in (44.5 mm)	0,63 in (16.0 mm)	3,5 in (88.9 mm)	2.83 in (71.9 mm)	1 in nptf

MINI BALL VALVE MODEL MBV

Illustrated model: MBV25R

Diagram: MBV25L

Specifications

Housing:	Brass	
Packing:	Teflon	
Maximum operating pressure:	600 psi / 4 137 kPa	
Maximum operating temperature:	250°F / 120°C	
Opening:	Left turn	Right turn
Certification:	Canadian Registration Number (CRN) for all provinces.	

Connection	Product code	Product code
1/4 in nptf x 1/4 in nptm	MBV25L	MBV25R

Notes

- 1) The mini ball valve is an economical way to protect and stop the flow of air or fluid into the pressure gauge.
- 2) It is always recommended to install a mini ball valve or a needle valve on a line before each pressure gauge installation.

304 stainless steel schedule 80		1 645 psi		SI50304-80
316 Stainless Steel schedule 40		782 psi		SI50316-40

Notes

- 1) Pigtail siphons are installed on steam line in order to protect the pressure gauge and related connections from the medium. The curved part of the siphon generates a condensation formation that remains in the curved part of the siphon to protect the measuring instrument.
- 2) It is imperative to use a pigtail siphon on all devices when the temperature of the medium is 100°C (212°F) or more, it allows the hot medium to cool before entering the pressure instrument.
- 3) * Pressure and temperature may vary.

Dimensions as per diagram

Model	A	B	C	D
SI25	¼ nptm x ¼ nptm	5,80 in (147,32 mm)	2,23 in (56,64 mm)	1,70 in (43,18 mm)
SI50	½ nptm x ½ nptm	8,2 in (208,28 mm)	4,05 in (102,87 mm)	2,05 in (52,07 mm)

COOLING TOWER MODEL CTSS

Illustrated model: CTSS-50

Specifications

Housing:	316 Stainless Steel
Maximum operating pressure:	5 000 psi / 725 kPa
Maximum operating temperature:	750°F / 400°C

Connection	Product code
¼ in nptf x ¼ in nptm	CTSS-25
½ in nptf x ½ in nptm	CTSS-50

Notes

- 1) Used to cool fluid or media when product temperature exceeds maximum instrument temperature. The cooling of the media also depends on the ambient temperature. Usually the temperature drop ratio would be +/- 6: 1.

PTT (Test plug or Pete's Plug®) Pressure, temperature test plug

Illustrated model: PTP-50B

Illustrated model: PTP-25B

Illustrated model: BNO-253R

Specifications

Housing:	Brass
Core material:	Nordel
Connection:	¼ or ½ nptm
Cap retainer:	Plastic
Maximum operating pressure:	1 000 psi (6 894 kPa)
Maximum process temperature:	350°F (176°C)

Connection	Product code
1/4 in nptm	PTTP-25B
	BNO-253R
1/2 in nptm	PTTP-50B
Pressure gauge adapter for Pete's plug®	 GA-125PG

Notes

1) The PTT test plug facilitates quick pressure and temperature reading at recommended test points without disturbing the process.

SNUBBER MODEL SN

Illustrated model: SN

Specifications

Housing:	Brass or 304 stainless steel
Connection:	¼ in nptm x ¼ in nptf or ½ in nptm x ½ in nptf
Snubber element:	Sintered porous type 304 stainless steel. 10µ (W) / 5µ (A) / 40µ (O)
Pressure rating:	5K: 5 000 psi (34 475 kPa) 10K: 10 000 psi (68 950 kPa)
Maximum operating temperature:	Brass: -58 to 536 °F (-50 to 280 °C) 304 stainless steel: -319 to 1 472 °F (-195 to 800 °C)

Dimensions as per diagram

Model	A	B	C	D	E
SN25	1,65 in (25,4 mm)	1 in (25,4 mm)	0,75 in (19 mm)	¼ in nptf	¼ in nptm

A close-up photograph of a mechanical assembly, likely a pump or valve, featuring a diaphragm seal. The image is dominated by a blue color scheme, with a central white rectangular area containing the title text. The mechanical parts are metallic and show signs of wear and machining. A prominent threaded section is visible on the right side of the central assembly.

Diaphragm seals

MINI DIAPHRAGM SEALS, CRN APPROVED **MODELS MD175, MD250, MD251 AND MD250LP**

Illustrated model: MD175

Illustrated model: MD250

Illustrated model: MD250LP

Specifications

Body construction:	1 piece 316 stainless steel
Diaphragm:	Welded 316 stainless steel
Operating pressure:	From -30 to 60 psi use MD250LP, from 100 to 2500 psi or equivalence use model MD175, MD250 or MD251
Process connection:	1/4, 1/2, 3/4, 1 in nptf (1 in available only with MD250 and MD250LP)
Instrument connection:	1/4 or 1/2 in nptf
Compliance:	According to ASME B40.100 (B40.2)

To order, use the code in the corresponding column

Dimensions as per diagram

SANITARY DIAPHRAGM SEAL, CRN APPROVED
MODELS DTC150SS AND DTC200SS

Illustrated model: DTC150SS AND DTC200SS

Specifications

Body construction:	1 piece 316 stainless steel
Diaphragm:	Welded 316 stainless steel
Operating pressure:	30 to 1,000 psi or equivalence
Process connection:	1 ½ in (40 mm) or 2 in (50 mm) sanitary Tri-clamp® connection ⁽¹⁾
Instrument connection:	¼ in or ½ in nptf
Compliance:	According to ASME B40.100(B40.2)

To order, use the code in the corresponding column

Dimensions as per diagram

Tri-Clamp size	A	D	H	Product code
1,5 in (40 mm)	¼ in nptf	2 in (50,8 mm)	1,38 in (35 mm)	DTC150-25SS
	½ in nptf			DTC150-50SS
2 in (50 mm)	¼ in nptf	2,5 in (63,5 mm)		DTC200-25SS
	½ in nptf			DTC200-50SS

Notes

1) Tri-Clamp® is a registered trade mark of Tri-Clover®

2) Always include a filling according to the application (see page 53).

SANITARY GAUGE, 3A AND CRN APPROVED
MODELS SDTC150 AND SDTC200

Illustrated model: SDTC20025

Illustrated model: SDTC15040

Specifications

Gauge diameter:	2 ½ in (63 mm) and 4 in (100 mm)
Case:	Polished 304 stainless steel
Dial:	White aluminum with in Hg or psi in black, bar and kPa x 100 in blue
Ring:	Bayonet type, polished 304 stainless steel
Lens:	Polycarbonate
Pointer:	Black anodized aluminum, adjustable
Wetted parts:	316 Stainless Steel
Diaphragm seal fill:	Food grade glycerin 30 to 160°F / -1 to 71°C
Case fill:	Food grade glycerin 30 to 160°F / -1 to 71°C
Body construction:	1 piece polished 316 stainless steel
Diaphragm:	316 stainless steel welded
Operating pressure:	Maximum 75 % of full scale value
Process connection:	1 ½ in (40 mm) or 2 in (50 mm) sanitary Tri-clamp ⁽²⁾
Application reference:	Diaphragm seal ASME B40.100(B40.2) Grade 1A ± 1 % and pressure gauge ASME B40.100(B40.1) Grade B ± 2 %, 2 ½ in (63 mm) and Grade A ± 1 % for 4 in (100 mm)

A collage of various thermometers, including digital and analog types, with a red overlay. The background features several thermometers: a digital one in the upper left showing 19.8°C, an analog one in the upper right with a scale from 0 to 160, and a large analog one in the lower half with a scale from 0 to 160. The word "Thermometers" is written in a large, bold, red font across the center.

MODELS IT500A AND IT500S

Illustrated model: IT500A

Illustrated model: IT500S

Specifications

Case:	5 in (125 mm) impact resistant light gray plastic
Lens:	Standard glass
Stem:	Brass (Std), Lead Free Brass (-X), straight or 90° angle connection
Swivel nut:	Brass
Scale:	White aluminum, dual scale (°F and °C) with black markings
Well (included):	Brass, ½ in and ¾ in nptm (WIT500-07), Lead Free Brass (WIT500-07-X)
Filling type:	Organic blue
Ambient temperature:	-40 to 120°F / -40 to 49°C
Operating temperature:	Maximum 75 % of full scale value
Accuracy:	ASME B40.200 (B40.8), Grade B ± 2 % CAN/CGSB - 14.4
Certification:	Wells with Canadian Registration Number (CRN) for all provinces.

MULTI-ANGLE SOLAR DIGITAL INDUSTRIAL THERMOMETER

MODEL ITA900SD

Illustrated model: ITA900SD-35

Specifications

Case:	4 1/2 in (115 mm), black reinforced thermoplastic
Range:	-50 to 320°F (-45 to 160°C), dual scales with switch °F / °C
Display:	1/2 in LCD digits
Recalibration:	Potentiometer adjustment through case
Lux rating:	12 lux
Response time:	10 seconds
Connection:	1/4 in - 18 UNF, swivel nut 3/4 in nptm, fits a well
Stem:	Aluminum, adjustable angle with 360° rotation, 3 1/2 in (90 mm) or 6 in (150 mm) of length
Ambient temperature:	-30 to 140°F / -35 to 60°C
Well:	Available in brass, Lead Free Brass, 304 stainless steel or 316 (see options page 85)
Accuracy:	ASME B40.200(B40.4), Grade A ± 1 % CAN/CGSB - 14.4

Entirely interchangeable with industrial thermometer ITA900-35 or ITA900-60

BIMETAL THERMOMETER (FOR MAPLE SYRUP) MODEL MS

Illustrated model: MS

Specifications

Case:	304 stainless steel, with back side reset rod
Dial:	3 in (76 mm), 5 in (127 mm), white aluminum graduations °F in black
Ring:	304 stainless steel
Lens:	Glass, hermetically sealed
Pointer:	Balanced aluminum painted black
Movement:	Bimetallic coil
Stem:	304 stainless steel, 6 in (150 mm), 9 in (227 mm) and 12 in (300 mm)
Connection:	¼ in nptm center back mount
Ambient temperature:	-58 to 392°F
Operating temperature:	Maximum 75 % of full range value
Well:	Available in 304 stainless steel or 316 (see options page 94)
Accuracy:	ASME B40.200(B40.3), Grade A ± 1 % CAN/CGSB - 14.5

Notes

- 1) Well required when line pressure above 125 psi.
- 2) Other scales, types and models available upon request .

ADJUSTABLE ANGLE DIGITAL BIMETAL THERMOMETER MODEL DIGITAL B3DST

Illustrated model: B3DST

Specifications

Case:	304 stainless steel
Dial:	3 in (76 mm), 5 in (127 mm), white aluminum with LCD reading
Ring:	304 stainless steel
Lens:	Polycarbonate hermetically sealed
Pointer:	Digital display
Movement:	Solar digital
Stem:	304 stainless steel, 2 ½ in (63 mm), 4 in (100 mm), 6 in (150 mm)
Connection:	½ in nptm adjustable angle
Ambient temperature:	-40 à 275°F
Operating temperature:	Maximum 75 % of full scale value
Well:	Available in 304 or 316 stainless steel (see options page 94)
Accuracy:	ASME B40.200(B40.3), Grade A ± 1 % of the full scale CAN/CGSB - 14.5

Dimensions as per diagram

Model	Ø	A	B	C	D	E	F	G	H

WELL FOR BIMETAL THERMOMETERS FIXED OR ADJUSTABLE STEM MODEL WEL

Illustrated model: WEL03-SS316B

Illustrated model: WEL03-SS316

Specifications

Type:	For use with bimetal thermometer B3, B5, B3A, B5A and BDST3 2 1/2 in (63 mm), 4 in (100 mm), 6 in (150 mm), 9 in (225 mm) and 12 in (300 mm) stem
Material:	304 or 316 stainless steel
Connection:	1/2 in nptf for bimetal connection and 1/2 or 3/4 in nptm for process connection (see dimensions chart to select the right choice).
Reference:	ASME B40.200
Certification:	Canadian Registration Number (CRN) for all provinces.

HOT WATER BIMETAL THERMOMETER

MODEL B252

Illustrated model: B252

WEL-PRESS

WEL-04PW

Specifications

Case:	Aluminium
Dial:	2 ½ in (63 mm) white aluminum with graduations °F in black and °C in blue
Ring:	Steel chrome plated
Lens:	Glass
Pointer:	Aluminum painted black
Movement:	Bimetallic coil
Stem:	Brass, 2 in (50 mm) center back
Well available: ¹⁾	½ in npt brass or Lead Free Brass (-X)
Ambient temperature:	-40 to 250°F / -40 to 121°C
Operating temperature:	Maximum 75 % of full scale value
Accuracy:	ASME B40.200(B40.3), Grade B ± 2 % CAN/CGSB - 14.5
Certification:	Wells with Canadian Registration Number (CRN) for all provinces.

To order, use the code in the corresponding column

Range	Connection		Product code
30 to 250°F / 0 to 120°C	With well ½ in nptm	Brass	B252-04PW05-CRN
	With well ½ in nptm	Lead Free Brass	B252-04PW05-XCRN

Notes

1) Sweat type (well-press) available on request.

CLAMP-ON THERMOMETER MODEL TCL250

Illustrated model: TCL250-08

Specifications

Case:	Zinc plated steel with spring attachment
Dial:	2 1/2 in (63 mm) white aluminum, graduations °F in black and °C in blue
Ring:	Steel chrome plated
Lens:	Acrylic
Pointer:	Aluminum painted black
Movement:	Bimetallic coil
Stem:	Brass surface with zero reset
Ambient temperature:	-40 to 250°F / -40 to 121°C
Operating temperature:	Maximum 75 % of full scale value
Accuracy:	ASME B40.200(B40.3), Grade B $\pm 2\%$ CAN/CGSB - 14.5

To order, use the code in the corresponding column

Range	Product code
30 to 240°F / 0 to 115°C	TCL250-03

REMOTE READING HVAC THERMOMETER MODELS T200 AND T250

Illustrated model: T200FF-02

Illustrated model: T200UC-00

Specifications

Case:	304 stainless steel, front flange or U-clamp
Dial:	2 in (50 mm), 2 1/2 in (63 mm) white aluminum with graduations °C in blue, °F in black
Lens:	Acrylic snap in
Pointer:	Adjustable, aluminum painted black
Movement:	Brass
Bourdon tube:	Phosphor bronze
Capillary:	108 in (3 m) double braided copper, plastic coated
Capillary outlet:	Center back
Bulb:	Brass, plastic coated
Operating temperature:	Maximum 75 % of full scale value
Accuracy:	ASME B40.200(B40.4), Grade B $\pm 2\%$ CAN/CGSB - 14.4

To order, use the code in the corresponding column

REMOTE READING SOLAR DIGITAL THERMOMETER

MODELS DIT200 AND DIT250

Model DIT200

Model DIT250

Specifications

Case:	304 stainless steel c/w front flange
Dial:	2 in (50 mm), 2 ½ in (63 mm)
Lens:	Polycarbonate
Capillary outlet:	Center back
Capillary:	48 in (1.4 m) PVC
Probe:	304 stainless steel
Display:	Liquid crystal (LCD) up to 3 digits and one decimal
Energy source:	Solar powered, includes lithium back-up battery
Ambient temperature:	14 to 140°F / -10 to 60°C
Operating temperature:	Dual scale switch -58 to 302°F / -50 to 150°C
Accuracy:	ASME B40.200(B40.3), Grade A ± 1 % CAN/CGSB - 14.5

To order, use the code in the corresponding column

Diameter Ø	Range	Product code
2 in (50 mm)	-58 to 302°F / -50 to 150°C	DIT200

REMOTE READING THERMOMETER MANUFACTURED AT OUR PLANT

MODELS TC6 AND TC7

Illustrated model: TC6

* See illustration of the TC7 model on the next page

Specifications

Case:	Cast aluminum painted black, back flange standard
Dial:	White aluminum, black graduations °F inner, °C outer
Ring:	3 1/2 in (87 mm) cast aluminum, painted black 4 1/2 in (115 mm) chrome plated steel
Lens:	Glass, lexan optional
Pointer:	Anodized black aluminum, adjustable
Bulb and Connection:	Bulb 3.49 in (88.7 mm) long x 7/16 in (11.2 mm) Ø, fittings 5/8 - 18 UNF and 5/8 - 18 UNF x 1/2 in nptm
Movement:	Brass
Capillary:	6 feet (1.83 m) double braided copper standard, up to 65 feet (19,8 m)
Well:	Available in brass or 316 Stainless Steel (see options page 104)
Accuracy:	ASME B40.200(B40.4), Grade B ± 2 % CAN/CGSB - 14.4

Notes

- Models TC6 and TC7 are remote gas vapor activated thermometers (up to 65 ft (19,8 m) between bulb and dial).
- Temperature changes absorbed by the capillary or housing do not affect the temperature reading.
- Additional capillary length available upon request.
- Flexible 304 stainless steel armor flex protection, available upon request.
